

# STEEL & ALUMINUM TARIFFS AND COUNTERMEASURES COST U.S. JOBS

The Canada–U.S. economic partnership supports millions of U.S. jobs spread across every Congressional district. The Administration’s decision to impose tariffs on steel and aluminum, and dollar-for-dollar Canadian countermeasures will cost jobs in every state. In fact, estimates show that for every steel and aluminum job saved, sixteen will be lost as a result of the tariffs and the global response.

*Global countermeasure figures are from a Trade Partnership study; Canadian countermeasure figures are from an unpublished Trade Partnership study.*
